Our Purpose

Every day, **240** children are hospitalized, mostly in the 0-4 age group, including **82** for surgery*.

Mission

Opération Enfant Soleil raises funds to support the development of quality paediatrics for all sick children in Québec.

Vision

To be a great **unifying** force for Quebecers around the cause of sick children and thus increase our **impact** on the province's health institutions.

Values

Solidarity + Proximity + Transparency + Ambition

73% of Quebecers are familiar with Opération Enfant Soleil**

1st choice in philanthropy***

Everything is better when things are their size.

That's why we've been tailoring care to children's needs for 35 years.

A Word from the Chairman of the Board, and the President and CEO

Together Towards a Bright Future

2021-2022 remains a challenging year: the still very present pandemic, the more strained economic situation and workforce issues have impacted our activities and the philanthropic community. But out of the difficulties come opportunities. Still driven by the same desire to make a difference in the lives of sick children, the Opération Enfant Soleil team has stepped up its adaptability and creativity.

Proximity

In the spring of 2022, when we visited each of the regions, we proudly presented **contributions that allowed for the realization of 116 projects across the province.** The result of your incredible generosity and a year of work is a tangible response to the needs of major paediatric centres, as well as regional hospitals and organizations, to provide the best care for our little ones, including:

- The acquisition of state-of-the-art equipment, adapted to the size of the children;
- The creation of comfortable and optimal care environments;
- Community-based care, close to home and family;
- Innovative research projects, to go further.

Solidarity

Our meetings in the hospitals allow us to see the major impact of Opération Enfant Soleil over time, but also the changing needs, reminding us of the importance of our mission. Your solidarity with the children, their families and the health care teams has been decisive. It changes everything. It motivates our creativity and your commitment inspires our resilience.

In 2021-2022, with you, we surpassed an ambitious goal considering the context, raising a total of \$21.8 million.

Ambition

An exceptional result, which motivates us to always do better.

In a collective and participatory approach, we have been thinking about the future. Our EVOLUTION plan is based on three main areas:

- **Our team and its efficiency:** to always do better;
- **Our outreach:** to showcase our mission and our tangible impact;
- **Our development strength:** to maximize our impact and respond to tomorrow's context.

With this action plan, we are aiming for \$25 million in 2025, which represents a 15% growth in three years. An ambitious plan, but within our reach, thanks to your support.

Transparency

This annual report is above all yours. From the process of awarding grants in the regions, to the scope of the projects funded, to the audited financial statements, it is a reflection of what we have achieved together. Each link in this great chain of solidarity is of vital importance in achieving our mission.

Thank you for your trust. Thank you for being that reassuring ray of hope for the children.

Because little miracles don't happen on their own.

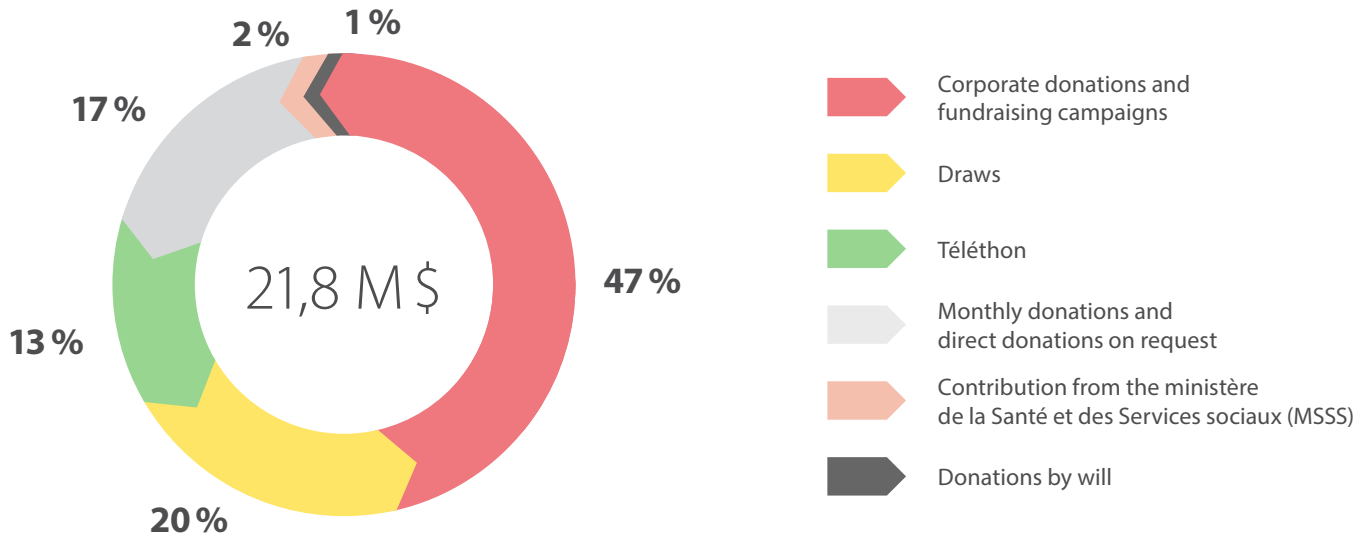

M. Pierre Bolduc
Chairman of the
Board of Directors

Jonathan Gendron
President and CEO

Summary of Our Financial Results

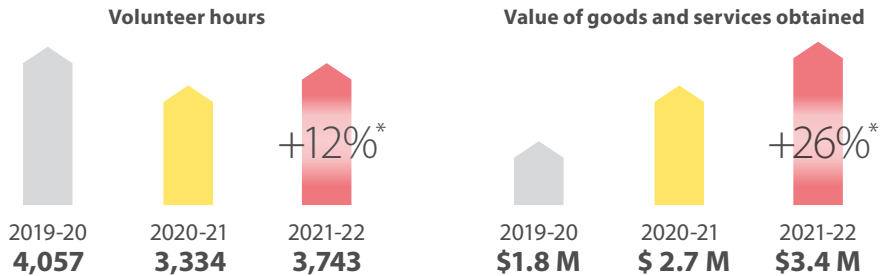

Sources of Income in 2021-2022

Additional Contributions

To optimize the amount of money donated to the children, we maximize the time generously donated by our volunteers and the search for goods and services.

*Compared to the previous year

Where Do Your Donations Go?

For every dollar donated to Opération Enfant Soleil:

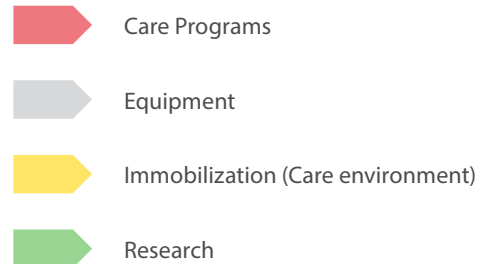

\$0.75 is invested in funding for care and prevention projects and to support our efforts to raise awareness and support the paediatric sector

\$0.17 is invested in supporting fundraising campaigns

\$0.08 supports the day-to-day operations of the organization

Distribution of Grants Awarded in 2021-2022

13% donated to regional health and social service institutions to provide community-based care for children.

87% to the four major paediatric centres that provide children in all regions of Québec with specialized care that cannot be provided in regional hospitals.

Since 1988

288+ million

were distributed throughout Québec to finance equipment and care adapted to the needs of children.

1. Our Achievements

The 2022 Téléthon

An exceptional amount of **\$20,682,867**

« After 35 years, the Téléthon remains an extraordinary fundraising tool. It also raises awareness of the mission and reports on progress in the paediatric sector. It is above all a moment of solidarity with sick children that is part of Québec's culture. »

—Jonathan Gendron, President and CEO of Opération Enfant Soleil

Jeanick Fournier, accompanied by her children, in an interview with Alain Dumas

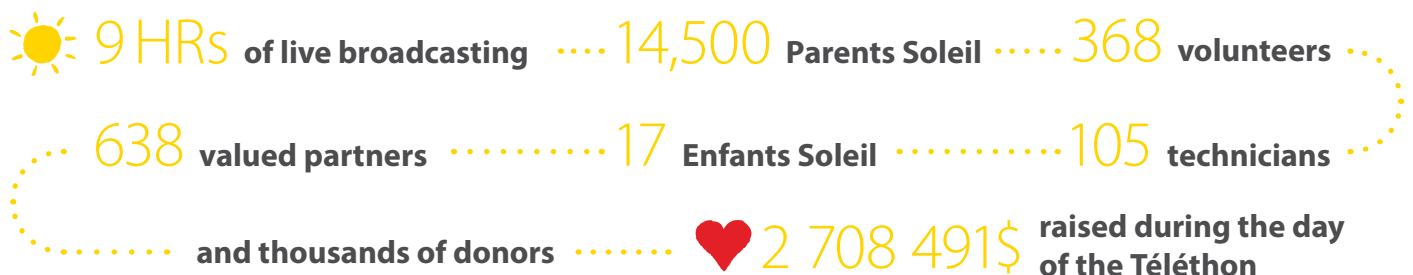

Maxime Landry and Annie Brocoli, surrounded by Madame Labriski, Louis-Georges Girard, Taïna Lavoie and Alain Dumas

Alain Dumas pays a touching tribute to the children who left us in the last year

Our Donation Programs

Planned Donation – Les Éclaireurs

For Marie-Claude and 163 other Éclaireurs, brightening up the future of children starts now!

Marie-Claude is 59 years old. She is young. She is positive, inspiring.

She still has time to do some good with her Téléthon donations for many years and is already preparing for her retirement by planning to volunteer again. It is this ability to plan for the future that has prompted her to make a will in 2020 in which she will donate to HER cause.

With the advice of her notary, she plans for the different scenarios regarding her daughter, her main heir, to ensure that everything will happen as she wishes. This way of giving allows her to do what she can. Her daughter knows how committed she is to sick children.

She is aware that their vision may not be entirely the same, particularly because of her age. *"It's possible that she's not there yet ... and that's okay."* But, for her, it's a given that donating in a will is not giving less to one's heirs. Instead, it is more about conveying the importance of something as visceral as a cause that has resonated in her heart for so many years.

le don
planifié

« I have faith in the children's future thanks to Opération Enfant Soleil. It's thanks to them that we can go ahead with the purchase of equipment. Opération Enfant Soleil, it's concrete in the lives of Quebecers. »

- Marie-Claude

Patricia, Parent Soleil and Antoine

Monthly Donations – The Parents Soleil

« It's a symbol of being involved in the long run; it's being aware that children are in need, but not just one day a year. »

- Patricia

Note: All Opération Enfant Soleil draws were supervised in the presence of Raymond Chabot Grant Thornton.

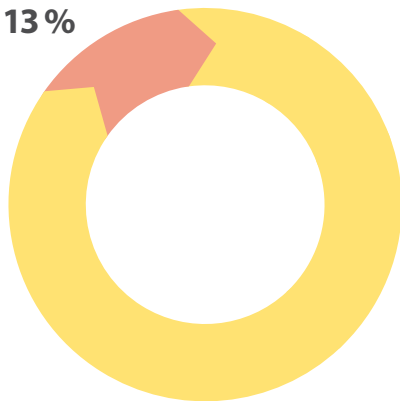

2. Your Impact

Regional Impact

Regional Community-based Paediatric Care

13%

13% of net revenues are donated to regional health and social service institutions to provide local care for children.

Each year, health experts meet on a volunteer basis to rigorously study all the requests submitted by the hospitals, and then recommend the allocation of funds in all fairness and according to the needs and levels of care of the institutions. These recommendations must be approved by the Board of Directors of Opération Enfant Soleil before the grants are distributed.

72 projects funded for a total of \$1,794,192

Partnership With the Ministère de la Santé et des Services sociaux (MSSS)

The ministère de la Santé et des Services sociaux (MSSS) has been a partner of Opération Enfant Soleil since the beginning. Thanks to successful agreements, Opération Enfant Soleil has been able to act as an important lever for the MSSS to support its mission of offering the best paediatric care to the children in Québec. Both agreements provide funding for equipment and capital projects in health care institutions located in regions outside the university sector.

Support for regional community-based paediatric care

Fund for the retention and repatriation of newborns in the regions

Opération Enfant Soleil and the MSSS join forces annually to offer a \$225,000 envelope each, allowing the financing of equipment intended for the retention and repatriation of newborns in the regions. This equipment is intended exclusively for the neonatal clientele.

28 projects for a total of \$224,900
(\$449,800, including the MSSS contribution)

Regional capital projects fund for paediatrics

Opération Enfant Soleil and the MSSS join forces annually to offer a \$300,000 envelope each, allowing for the implementation of capital projects (sustainable development of care environments) such as expansion, redevelopment and safety/obsolescence in sectors serving paediatric clientele.

4 projects for a total of \$300,000
(\$600,000, including the MSSS contribution)

Examples of Funded Projects

Capitale-Nationale

IRDPOQ, \$65,193, binocular eye-tracking system

This equipment helps identify the causes of deficits in the performance of daily living tasks in children with neurological impairments, which are difficult or impossible to detect in traditional clinical assessments.

It combines the assessment of multiple systems (visual, proprioceptive, motor) in a single test and reduces the burden of assessment on children and their families.

Théo, 6-year-old ans Photo: CIRRIIS

Lanaudière

Hôpital Pierre-Le Gardeur, \$26,872, neonatal resuscitation table

This equipment provides the necessary first aid for newborns in the first few minutes of life.

It allows the monitoring of breathing, heart rate and oxygen saturation of newborns in a non-invasive way and without the need for additional medical equipment. In addition, the table maintains the ideal body temperature for the newborn as it is heated.

The resuscitation table is equipped with the systems for resuscitation, negative pressure ventilation and oximetry – all the equipment needed to perform resuscitation on a high-risk neonate.

Benefits:

- Reduce the risks for newborns who need respiratory assistance at birth or resuscitation;
- Ensures faster, more effective and safer interventions for newborns;
- Ensure that the necessary equipment is available at all times;
- Provide accessible, quality care for all newborns at risk;
- Overall, always ensure the well-being and general health of infants.

Abitibi-Témiscamingue

Hôpital de Rouyn-Noranda, \$63,414, redevelopment of the paediatric unit (including the MSSS contribution)

Benefits for the children and their families

These changes have made it possible to ensure better follow-up of children from birth and to offer safer care in connection with team support (less staff turnover). This redevelopment has also made it possible to offer a pleasant and comfortable environment for families.

A big difference for medical teams

This new space has maximized the use of resources, enabled more effective mentoring of new nurses and direct access for care support.

« The grants from Opération Enfant Soleil provide us with a lot of state-of-the-art equipment, allow us to keep our children close to home, to have families reunited in our region and to provide safe care. They are an ideal partner, and we are very happy to have them in our lives and in our care. »

— Nathalie Leblanc, head of the mère-enfant unit

CHU Sainte-Justine

Our contribution in 2022 \$3,578,349
Since 1989 \$71,781,309

The Centre ambulatoire Opération Enfant Soleil – A long-term financial commitment to support the CHU Sainte-Justine’s shift to ambulatory care

In total, the Centre ambulatoire Opération Enfant Soleil will include 54 separate clinics that will provide specialized care and:

- Reduce hospitalizations or shorten their duration;
- Accommodate more patients;
- To better meet the needs of children and their families with more adapted spaces;
- Offer care training to parents in comfortable settings;
- Introduce new technologies;
- Accommodate the equipment needed for every day care.

A before/after of one of the clinics of the Centre ambulatoire. Photo: Véronique Lavoie

A highly frequented facility with nearly 260,000 appointments annually

Modern and adapted spaces. Photo: Véronique Lavoie

« The help granted by Opération Enfant Soleil will allow us to concretize the vision of care that we want to offer to our patients, to modernize these spaces, to offer quality care and a better care experience in general to our patients and their families. »

—Bénédicte Therrien Hogue, specialized nurse practitioner in plastic surgery for burn victims at CHU Sainte-Justine

State-of-the-art plastic surgery clinic

Next clinic to be upgraded thanks to a **\$2.7 million** contribution from Opération Enfant Soleil

The clinic provides care and follow-up for children with congenital deformities or acquired deformities. Most of the procedures are for facial, trunk and limb reconstruction. It holds the title of provincial trauma and burn centre.

Annually, this clinic treats 6,000 children with a projection of 7,000 once the redevelopment is completed.

Hôpital de Montréal pour enfants

Our contribution in 2022 \$3,578,349
Since 1989 \$71,781,309

Nathalie, Raphaël's mother. Photo: Nathalie Nicolas

Fewer wires, more hugs.

Smart technology

« Having a sick child will never become normal, but we can get closer to it, and that is what helps our heart as parents. »

—Nathalie Nicolas, mother of Raphaël who was very premature and is participating in the first phase of the study

Opération Enfant Soleil's contribution to the project's start-up fund **\$787,500**

Clinical research. Smart hospital project.

For many hospitalized newborns and premature infants, survival depends in part on hard-wired vital signs monitors. Currently, these babies have five to 10 electrodes glued to their fragile skin. These sensors monitor blood pressure, temperature, oxygen, and pulse. That's a lot of wires, especially since they are cumbersome, complicate care and increase the risk of infection. For parents, all these wires are often a source of stress and can compromise the all-important bonding with their newborn.

A first of its kind in Canada, the "Smart hospital" project aims to develop a wireless monitoring system. This is done using portable vital signs monitors that consist of only two sensors: a small patch on the baby's chest and a bracelet on the baby's fist or ankle. **That's it!** Parents can therefore hold their baby more easily and share more precious moments with him or her. Daily care as well as the care of health care professionals will be greatly facilitated by wireless monitors.

The Smart hospital project has the potential to transform paediatric care while positively impacting the health of fragile newborns here in Québec and around the world.

The current study will test the accuracy and effectiveness of these new monitors.

Raphaël, grand prématuré. Photo: Nathalie Nicolas

Development of a new paediatric ambulatory care unit (USAP) at the Centre mère-enfant Soleil

The new paediatric ambulatory care unit opened on June 14, 2022. It offers open, adaptive, and playful spaces, while meeting the diverse needs of children requiring both day and overnight medical treatment.

This unit was adapted to improve the accessibility and quality of care for children throughout Eastern Québec. It also meets the needs expressed by caregivers to provide safe and quality care.

The paediatric ambulatory care unit team, at the opening of the centre

An initial investment to set up the new unit, 100% financed
by Opération Enfant Soleil **\$1,215,131**

Nicholas and his mother, Lia

Benefits for children

Comfort: The treatment room, cubicles and rooms offer a soothing and secure environment. A kitchen area and a locker room have been set up for the families.

Access to care: The review of the work organization has more than doubled the number of appointments annually, from 3,300 to 7,000.

Quality of care: Two individual negative pressure rooms allow for the safe accommodation of patients who must be kept in isolation, in compliance with infection prevention and control standards.

Sensory adaptations: Two fixed ceiling track lift and dimmed lights were added to accommodate some children's special health conditions.

Chloé, lors d'une hospitalisation à l'âge de 2 ans

« Allergies are a serious but invisible health problem, so they are easy to forget. But for us, it almost cost us our daughter's life. Having an immunotherapy clinic within minutes of our home really means a lot to us and our daughter. »

—Camille D'Amours and Julien Prévost, parents of Chloé, 3 years old, outpatient at the Clinique d'immunothérapie orale

Lexie, 8 ans et sa maman

Clinique d'immunothérapie orale (CITO) Enfant Soleil, 100% financé by Opération Enfant Soleil

As of May 2021, CITO has been treating children with food allergies through desensitization, in a safe and medically supervised manner.

The food to which the child is allergic is ingested daily in a minimal measured dose. The quantity is increased until the child tolerates the food or is no longer allergic to it. This new therapeutic approach has been scientifically proven and has a very high success rate.

Since its opening, the clinic has already treated more than **150 children** with severe allergies, allowing them to be cared for in their region. For families of children in the Estrie region who suffer from allergies, the accessibility of this clinic near their home makes all the difference!

\$10 million contribution from Opération Enfant Soleil
Building completion: December 2023
Scheduled to open in 2024

The construction of the Pavillon Enfant Soleil is progressing well!

Opération Enfant Soleil is a major partner in the project for this centre, which will make it possible to offer the best care to children in the Estrie, Centre-du-Québec and part of the Montérégie regions.

This project of more than \$300 million will include several units such as maternity, neonatology, paediatrics, and child psychiatry. The centre will also meet the demand for care and services related to the increase in births, the increase in the needs of premature babies, the increase in requests for consultation in paediatrics and child psychiatry, as well as improve access to emergency care for children and their families.

Photo: Consortium of architects – Jodoin Lamarre Pratte | Yelle Maillé et associés | Équipe A (Image for reference only)

Fonds sport et santé durable

Committed to helping them grow up well!

The Opération Enfant Soleil's **Fonds sport et santé durable** aims to promote and support healthy lifestyles for children through sport, physical activity, and healthy eating, as well as to cultivate emotional and mental well-being.

To achieve its objectives, the fund adopts three areas of action addressing both physical and mental health issues:

- Prevention
- Training, education, and coaching
- Healing and coping

Each year, the projects funded by the Fonds sport et santé durable are selected according to the same allocation protocol as for the regional grants, based on the benefits and needs presented.

* Qu'est-ce que la santé durable? | Alliance santé Québec www.alliancesantequebec.com/quest-ce-que-la-sante-durable/

43 projects in 2022
For a total of \$106,877

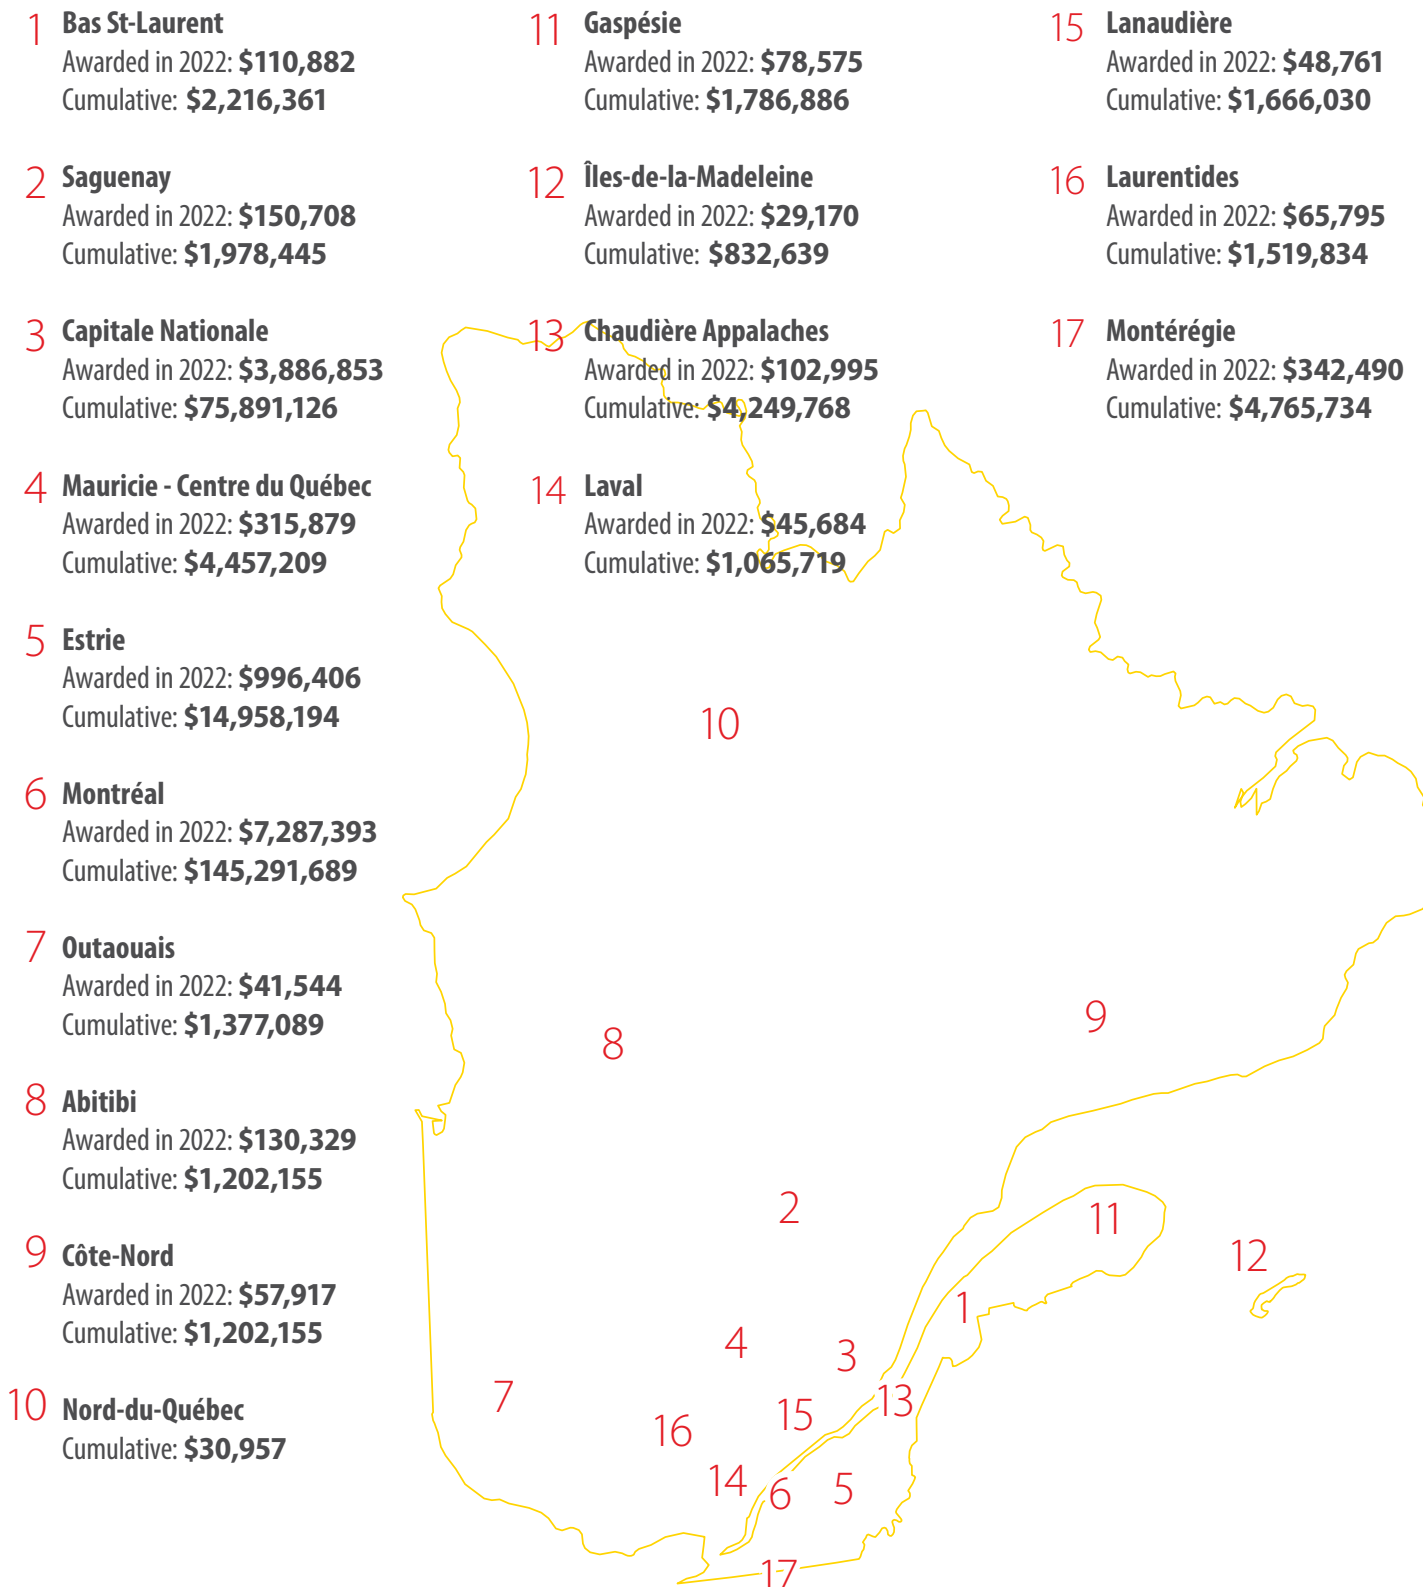

An example of a funded project

Indoor sensory motor course for Lévis's Société Grand Village

The motor courses have many benefits for the children, allowing them to become aware of their possibilities. The motor experience allows the child to develop and refine his or her motor coordination, participates in the acquisition of language, encourages autonomy and initiative, and allows the child to take calculated risks in a safe and adapted space. The motor course benefits especially the target clientele aged 3 to 12 years old living with autism spectrum disorder or intellectual disability.

The Scope of Your Generosity

116 grants awarded across the province in 2022

To view the details of each region's grants, visit: www.projetsfinances.operationenfantsoleil.ca

3. Together Everything Is Possible

Enfants Soleil

In 2022, 17 new **Enfant Soleil** families became ambassadors for the cause of **Opération Enfant Soleil**.

By agreeing to share their touching stories, these families from all regions of the province inspire each of **Opération Enfant Soleil**'s initiatives and each of the actions of our donors, volunteers and partners: they are the very essence of the work accomplished every day.

Thank You to Our Partners, Donors and Volunteers

Our Precious Volunteers

Thank you to the volunteers who offer their time, talent, and energy with such passion. There are hundreds of you across the province who have been committed to children, sometimes for many years. Your contribution is essential, and you have our gratitude for the work you do!

Our Generous Donors

Your donations are a great encouragement and have a very real impact on children and their families who are facing disease. Thank you for being at their side and thank you for including us in your desire to brighten their future.

Human resources committee:
President: Mr. Pierre Léveillé

5 Advisory Committees

Development – Téléthon – Foundations – Partners – Innovation

Depending on the various organizational needs, the advisory committees meet on an ad hoc basis. Pierre Bolduc, Esq, Chairman of the Board of Directors, is an ex-officio member of all committees.

Financial Results Summary

This year, thanks to the generosity of its many donors, the valued collaboration of its partners and the dedication of its volunteers, Opération Enfant Soleil is allocating and investing \$16.1 million to contribute to the development of high-quality paediatric care throughout the province and to raise awareness among the Québec population.

*The administrative agreement between the MSSS and Opération Enfant Soleil for the support of university paediatric centres having ended as of August 31, 2021, the sums associated with this agreement are no longer considered in the financial statements of Opération Enfant Soleil as of 2021-2022.

All detailed financial information is provided annually in the T3010 form, which is available on the Canada Revenue Agency (CRA) website at cra-arc.gc.ca.

The financial statements for our last fiscal year 2021-2022 were audited by Raymond Chabot Grant Thornton. This firm is also responsible for providing the government with our completed T3010 form.
